

This product has the same active ingredient as Frontline (9.8% Fipronil solution).

The product is a liquid 9.8% Fipronil solution and no mixing is required. It is ready to go right from the bottle.

There are 3.7 ml in a dram; therefore, each 2-dram bottle contains about 7.4 ml of solution.

The dosage chart is as follows:

Dog 0-22 pounds, .67 ml

Dog 23-44 pounds, 1.33 ml

Dog 45-88 pounds, 2.67 ml

Dog over 88 pounds 4.02ml

**Cats of ANY weight, .5 ml applied in one spot on back of neck.
That's 1/2 ml**

Puppies and kittens should be at least 8 weeks old

Place the applicator tip through your pet's hair to the skin between the shoulder blades. Squeeze the applicator and apply the entire contents in three or four spots down the dog's spine. Again, cats should be dosed in one spot on back of neck

One application will last about a month
